

## *Environmental Policy Statement*

The waste management operations of this company are committed to comply with full implementation of the Environment Protection Act 1990 and any amendments. It will seek to promote the conservation and sustainable use of natural resources and minimise environmental pollution by its influence over others. The company currently recycle up to 85% of all waste handled and is examining ways to further reduce the waste taken to the landfill to comply with government targets.

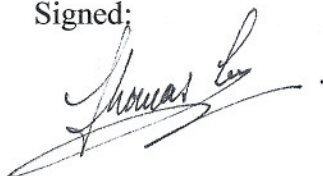

L & B Haulage & Civil Engineering Contractors Ltd will review all its policies, services and activities to achieve this commitment. The objective is to minimise the impact of all operations on the environment.

Measures to minimise pollution from dust, noise and vibration nuisance are constantly under review and subject to a quality assurance procedure in place.

All waste movement operations are carried out by properly licensed carriers, registered with the Environmental Agency. Waste not recycled is taken to correctly licensed landfill sites with all documentation retained to prove compliance.

Site risk assessments & COSHH assessments form part of this environmental policy, and are regularly reviewed and audited to ensure that the standards are met.
